### B.Tech (AI-ML)

JG- University

📍 Ahemdabad, Gujarat

Currently pursuing B.Tech in AI-ML, studying machine learning algorithms, data structures, and core programming. Also exploring web development through personal projects, building modern, responsive websites to strengthen full-stack skills.

## Professional Summary

---

Dedicated and curious AI-ML student with a strong interest in coding, problem-solving, and real-world application of machine learning concepts and also in Web- Development. Despite initial communication challenges, I have worked hard on improving my confidence through collaborative projects and public interactions. Looking for a role where I can keep learning and contribute meaningfully.

## Projects

---

### Volunteer Experience

I have developed several personal web projects to build practical skills in front-end development and deliver responsive, interactive designs.

Personal Portfolio Website:

Responsive site showcasing my skills and projects with clean design and easy navigation.

Amazon Home Page Clone:

Front-end replica built with HTML and CSS to practice complex layouts.

Tic Tac Toe Game:

Interactive game using JavaScript with win/draw logic and responsive design.

Rock Paper Scissors Game

Browser-based game featuring dynamic UI and gameplay logic in JavaScript.

## Work Experience

---

While I have no formal industry experience, I have independently built responsive, user-friendly websites using HTML, CSS, and JavaScript. These self-directed projects demonstrate my ability to learn quickly, solve real-world problems, and create modern, effective designs.

## Hobbies

---

Sketching and creative drawing, outdoor sports and games to maintain fitness, and social activities with friends to encourage teamwork and communication.
